ANNUAL STATEMENT FOR THE YEAR 2018 OF THE AMERIHEALTH MICHIGAN, INC.

NOTES TO FINANCIAL STATEMENTS

These items are based on illustrations taken from the NAIC Annual Statement Instructions

1. Summary of Significant Accounting Policies and Going Concern

- A. Accounting Practices
The financial statements of AmeriHealth Michigan, Inc. (the Company) are presented on the basis of accounting practices prescribed or permitted by the Michigan Department of Insurance and Financial Services (DIFS).

The Michigan DIFS recognizes only statutory accounting practices prescribed or permitted by the State of Michigan for determining and reporting the financial condition and results of operations of an insurance company, and for determining its solvency under the Michigan Insurance Law. The National Association of Insurance Commissioners' (NAIC) *Accounting Practices and Procedures Manual* (NAIC SAP) has been adopted as a component of prescribed or permitted practices by the State of Michigan. The State has adopted certain prescribed accounting practices that differ from those found in NAIC SAP. As of December 31, 2018, these prescribed accounting practices are not applicable to the Company.

A reconciliation of the Company's net loss and capital and surplus between NAIC SAP and practices prescribed and permitted by the State of Michigan is shown below:

- B. Use of Estimates in the Preparation of the Financial Statements
The preparation of financial statements in conformity with accounting practices prescribed or permitted by the Michigan DIFS requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.
- C. Accounting Policy
The Company uses the following accounting policies:
- (1) Short-term investments – None
 - (2) Bonds and other debt instruments are stated at amortized cost or at values prescribed by the Michigan DIFS. Bonds with an NAIC designation of 3 through 6 are reported at the lower of amortized cost or fair value. The amortized cost of bonds is adjusted for amortization of premiums and accretion of discounts using the scientific-interest method. Realized investment gains and losses on the sale of investments are recognized on the specific-identification basis as of the trade date. Realized losses also include losses for fair value declines that are considered to be other than temporary. Interest income is recognized when earned.
 - (3) Common Stocks – None
 - (4) Preferred Stock – None
 - (5) Mortgage Loans – None
 - (6) Loan-backed securities – None
 - (7) Investments in subsidiaries, controlled and affiliated (SCA) entities – None
 - (8) Investments in joint ventures, partnerships and limited liability companies – None
 - (9) Derivatives – None
 - (10) Anticipated investment income as a factor in premium deficiency calculation – None
 - (11) Accrued Medical Expense/Unpaid Claim Adjustment Expense – Accrued medical expenses and unpaid claims adjustment expenses include medical expenses billed and not paid, an estimate for costs incurred but not reported (IBNR), and estimated costs to process these claims. To estimate the IBNR balance the Company uses the triangulation method. The method of triangulation uses estimates of completion factors, which are then applied to the total paid claims net of coordination of benefits to date for each incurred month. This provides an estimate of the total projected incurred claims and total amount outstanding of claims incurred but not reported. Consideration is also given to changes in turnaround time and claims processing, which may impact completion factors. Substantially all of the IBNR balance as of December 31, 2018 relates to the current year.

The Company determines IBNR in accordance with actuarial principles and assumptions that are commonly used by health insurance actuaries and meet Actuarial Standards of Practice. Actuarial Standards of Practice require that the liabilities be adequate under moderately adverse circumstances. Actuarial estimates are based upon authorized healthcare services, past claims payment experience, member census, and other relevant factors. The Company consistently applies its reserving methodology from period to period and periodically reviews actual and anticipated experience compared to the assumptions used to establish medical costs.

While the Company believes the accrual for medical expenses is adequate, actual results could differ from such estimates. The Company recognizes any change in estimates in medical and hospital expenses in the period in which the change is identified.
 - (12) Fixed asset capitalization policy modifications – Electronic data processing (EDP) equipment exceeding three percent of statutory capital and surplus for the most recently filed statement with the Michigan DIFS (adjusted to exclude EDP equipment and deferred taxes) are designated as non-admitted assets and are charged directly to capital and surplus. Depreciation is calculated on a straight-line basis over the estimated useful life of the assets, which ranges from three to seven years. Maintenance and repairs are charged to operations when incurred.
 - (13) Pharmaceutical Rebates - Estimated rebates to be collected are based on rebates invoiced to the pharmaceutical manufacturers.
